- Education

Beijing University of Posts and Telecommunications: Undergraduate (2020.9--2024.7)

- Major: Data Science and Big Data Technology/ School of Computer Science: **Ranking** 13/ 61
 - Related courses: Computing and Programming Practicum (90), Object-Oriented Programming Design and Practice (java) (95), Course Project -- Data Structures (91), Introduction to Data Science (90)

- Professional Experience

2021.12 - - 2022.4 "Chu Yan"(college student entrepreneurship and innovation project) "ZhangXu"

A web application that offers psychological support services to individuals seeking help for psychological issues.

- **Backend Developer**
- After conducting extensive market research and demand analysis, I collaborated with team members to complete the project proposal for "Zhangxu".
- Responsible for backend development using the Django framework.
- Achieved a score of 92 to successfully complete the project.

2022.5 - - 2022.9 BUPT GAMMA LAB data mining lab GGL developer internship

GammaGL is a multi-backend graph learning library based on TensorLayerX.

- **GGL developer internship**
- Contributed to the development of the Graph Neural Network toolkit GAMMA GL.
- Conducted in-depth research on cutting-edge papers and delivered presentations during group meetings to explain the findings.
- Reproduced models by referring to the code provided by the authors and integrated them into our

framework.

- Completed the adaptation work for backend frameworks such as PyTorch, TensorFlow, PaddlePaddle, and MindSpore.

- Additional Information

Programming Language : Python, Java, C++, SQL

English level : CET-4 (596), CET-6 (492), TOFEL (86)
